mRNA Vaccine Toxicity

Readers of our website will be aware that the mRNA vaccines that have been used against COVID-19 have caused injury and death on an unprecedented scale in the history of medicine.

This book argues that these harms had to be expected from first principles of immunology. Furthermore, they are not limited to the COVID vaccines alone; instead, they are inherent in the mRNA technology as such. We must therefore expect that future mRNA vaccines against other viruses or bacteria will be similarly toxic. mRNA technology will never be safe to use for vaccination against any infectious agent.

The book is free to download right here. A printed copy can be ordered from [Lulu.com](https://www.lulu.com). An Italian translation is also available (please scroll to the bottom of the page).
